

Website that I have chosen to replicate - <https://www.tesla.com/>

The 3 web pages are:

1. Home Page :

2. About Us Page :

3. Charging Calculator Page :

The screenshot shows the Tesla Charging Calculator web application. The browser address bar displays 'tesla.com/charging-calculator'. The Tesla logo is in the top left, and navigation links for 'Vehicles', 'Energy', 'Charging', 'Discover', and 'Shop' are in the top right. The main heading is 'Charging Calculator' with the subtitle 'How much you can save with Wall Connector'. Below this are two tabs: 'Daily' (selected) and 'Monthly'. A Tesla Model S is shown with a charging cable. The results are displayed as '\$4.48 Charge Cost' and '\$12.48 Gas Savings'. At the bottom, there is a slider for 'Miles driven daily' set to 100 and a dropdown menu for 'Model S'. The Windows taskbar at the bottom shows the date as 30-01-2024 and the time as 72:11.
